SUMMARY

Electronics and Communication Engineering student with a good understanding of core electronics and C programming. Gained hands-on experience through academic projects involving RF amplifiers and microcontrollers. Actively preparing for campus placements and interested in opportunities related to core electronics, embedded systems, and software roles, with a strong willingness to learn and apply concepts in practical environments.

EDUCATION

GSSS Institute of Engineering and Technology for Women **CGPA-7.04(up to 4th sem)**
B.E. in Electronics and Communication Engineering
Expected Graduation: 2027

Manasarowar Pushkarni Vidhyashram **Percentage-79%**
Pre-University

B K S V B High School **Percentage-90.24%**
SSLC

TECHNICAL SKILLS

- **Programming Languages:** C, C++
- **Core Subject:** Digital Electronics
- **Web Technologies (Basic):** HTML, CSS
- **Tools:** VS Code, GitHub

PROJECTS

Location Guide Using RF and Microcontroller

Problem Addressed: Identifying the relative distance (near, mid, far) between a transmitter and receiver in a low-cost wireless system without using GPS or complex sensors.
Solution Implemented: Used a 433 MHz RF transmitter–receiver with an AT89S52 microcontroller to classify distance based on timing differences between received RF pulses and display the result on a 16×2 LCD.

CERTIFICATIONS

- AWS Academy Graduate – AWS Academy Cloud Foundations
- Web Development Training Certification – Internshala

ACHIEVEMENTS

- 3rd Place in Cloud Sprint Challenge 2.0 - Participated as a team member and secured third place by developing a cloud-based solution under time constraints.

- Member, Google Cloud Club – GSSS Institute of Engineering and Technology for Women
  Actively participated in cloud learning activities, collaborative projects, and technical discussions.
